

High Speed Roller Doors

MOVIDOR PRECISION ENGINEERED

FOR LASTING PERFORMANCE

FASTER

Your staff gain rapid access with a high speed door, that increases efficiency in your work place.

Ultra-smooth 3-sided track liner gives a smooth, frictionless run for the curtain, along with the variable speed controllers which open the door at speeds of more than 2.0 metres per second.

SAFER

Movidor lets your staff know when to keep clear of the door. High visibility is built into the door design. View panels are standard to show your staff what's on the other side.

Protect your people and equipment from collisions. The soft bottom buffer bends on contact, absorbing the impact. Your vehicles and people are safe, and so is your door.

A standard feature, Movidor's inbuilt Photocell beams detect objects in the opening, and instantly stops the door.

Like all Carona products, Movidor is backed by our 24/7 service. If there are any problems, our technicians will come to your site and get your door back online fast.

SMARTER

Movidor is designed to last, saving on ongoing maintenance. There's no need to put your plans on hold while you wait for a repair team. In case of impact, the flexible batons allow the door curtain to release from its tracks, with no need to replace any parts. Then Movidor's unique self-correcting action resets the door back on track.

Natural anodized finish, with integrated brush seals, provides many years of maintenance-free operation.

MOVIDOR FEATURE DESIGN

STREAMLINED HOOD COVERS

Motor and curtain roll are enclosed in an anodized pelmet. Movidor's design features a cleaner look and blocks dirt and dust, cutting cleaning and maintenance costs.

SELF-RESETTING CURTAIN

On impact, the laterally tensioned bars let the curtain bend, not break. Will spring back into place in an impact.

HIGH VISIBILITY

Integrated windows give your staff visibility to prevent collisions. High-vis batons and door frames add another layer of protection.

FAST, SMOOTH ACTION

The curtain runs on a 3-sided track liner for quiet, lightning-fast operation: up to 2.0m/s.

ACTIVATION

Movidor comes standard with pedestrian push buttons for activation. A range of radar sensors, floor loops and remote controls are also available to activate your door to suit your particular environment.

POWERED BY GERMAN ENGINEERING

SEW Eurodrive brake motors and gearbox come standard with every Movidor. The automated drive delivers superior reliability. Other motor brands are available for specific applications.

INSULATION

Standard brush seals give a tighter seal between the curtain and track, creating an efficient seal against temperature, dust and vermin.

EASY-TO-USE CONTROLS

Soft-touch control panel, with digital display for easy diagnostics and fault finding information.

CUSHIONING BATTERNS

Flexible bottom baton absorbs impact to protect vehicles and pedestrians. Then it springs back to shape, so no need for replacement parts.

MOVIDOR COMPLETE CUSTOMISATION

From the opening speed right down to the control cabinet coating, every aspect of your Movidor is open to be customized.

+ ADD SAFETY FEATURES

+ Add an infra-red sensor to detect when the doorway is blocked

+ Add an extra layer of photo cells

+ Add manual clain opening device

+ Add UPS power failure unit

+ Add LED Curtain position safety system

+ Add additional layers of windows in curtains

BEFORE

Food storage facility, Sydney Airport.

Conversion from manual PVC swing doors to efficient automotive Movidor high speed doors.

+ CHOOSE YOUR STYLE

+ Choose your size. From personnel doors up to 6m wide.

+ Choose window type. Clear PVC (standard) or mesh to allow air through.

+ Choose the frame colour. Natural anodized silver as standard. Can be powder-coated to any colour.

+ Choose control cabinet finish: Powder coated (standard), stainless steel (optional).

+ Choose the curtain colour. 6 standard colours. Other colours available on request.

BLUE RED GREEN YELLOW GREY WHITE

MOVIDOR ACTIVATION OPTIONS

+ CHOOSE ACTIVATION METHOD

Choose a way of triggering your door that fits your staff and workflows.

Push-button opening on both sides comes standard with all Movidors. You can choose other options too.

+ Choose buttons for simplicity

+ Choose radar with infrared safety curtain (set direction, range and profile) for universal access

+ Choose pull-cords for simplicity

+ Choose hand sensor for hygiene purposes

+ Choose floor induction loop – detects metal objects like forklifts and not people, so you avoid false triggers.

+ Choose remote control (up to eight chan.) for remote operation from nominated staff. Handheld or forklift mounted options.

MOVIDOR

MOVICHILL

FOR THE EXTRA COLD ENVIRONMENT

Gain rapid access with a door that performs, even in chiller or freezer rooms. We've tackled every challenge that comes with this environment, from insulation, to preventing condensation from pooling on the floor.

FREEZER AND CHILLER

- Curtain includes a layer of insulating polyurethane foam. This layer reduces heat transfer from your refrigerated area, cutting your energy costs.
- Heated frames & pelmets stop ice build up, so your door runs smoothly even in sub-zero conditions.

Insulated polyurethane foam to reduce heat transfer.

Heated frames to stop ice build up.

INSTALLATION, SUPPORT & MAINTENANCE

COMPLETE SUPPORT FOR THE LIFE OF YOUR DOOR

From installation to upgrade, we provide all your maintenance needs. Call us for urgent repairs, or get ahead of the game by scheduling a maintenance plan.

You'll save on expensive downtime by minimising the time your door is out of action, or eliminating it altogether with regular preventative maintenance.

BENEFITS

Fast..... we respond to all calls within four hours (during business hours) and with technicians stationed across New South Wales, we reach your site fast.

Reliable..... our staff are experienced in HACCP food safety requirements, and certified for working at heights. Carona's service team is backed by the same reputation for quality and integrity.

SERVICE OPTIONS

SCHEDULED MAINTENANCE PLANS

Cut downtime to a minimum by catching faults before they become an issue.

We'll tailor a service and maintenance schedule that fits the way your doors are used, factoring in corrosion in wet environments and wear from heavy use.

With substantial discounts for multi-month packages, Carona's plans are the best-value option for your business.

EMERGENCY REPAIRS

When your door breaks, call us. We have technicians throughout NSW who are ready to come to your site and get your doors working again.

We'll also service other brands.

You don't even need to be on a Carona maintenance plan to use our service. We're always ready to help.

“ We give 12 months warranty on everything we provide to our customers. So I get Carona to quote on pretty much every job I do, because I have 100% confidence in their product, and 100% confidence in their service. ”

Justin Colquhoun,

Engineer at Melbourne Refrigeration Services

“ We work with 35-40 service providers, and Carona’s professionalism puts them right at the top of the league. The team are 100% committed to their work, and dedicated to helping Woolworths. Nothing’s ever an issue. I’d recommend to anyone. ”

Brendan Ratcliffe

Asset specialist, Woolworths
